**COMMUNITY CALENDAR**

**June 2 & 3**  
Little Miss Spanish Fork Pageant

**June 2 & 3**  
Chalk It Up on Main

**June 3**  
2017 Wrangler Champions Challenge Rodeo @ Spanish Fork Fairgrounds, 8pm

**June 5 & 6**  
Recycle Pick-up

**June 6**  
City Council Meeting @ 6pm. Broadcast live on Spanish Fork 17 and YouTube.

**June 7**  
Planning Commission Meeting @ 6pm

**June 10**  
Street Fair on Main

**June 17**  
Community Health and Wellness Fair @ Spanish Fork Sports Park

**June 17**  
Street Fair on Main

**June 19 & 20**  
Recycle pick-up

**June 20**  
City Council Meeting @ 6pm. Broadcast live on Spanish Fork 17 and YouTube.

**RECREATION CALENDAR**

**June 1**  
Tennis Lessons and CUTA League registration ends

**June 2**  
Summer Swim Team Early Registration Ends

**June 3**  
39th Annual Huck Finn Day @ 9am in Canyon View Park

**June 6**  
Sports Fitness Camp Session II registration ends (ages 6-12)

**June 19**  
Spanish Fork Water Park CLOSED EARLY @ 6pm

**June 28**  
Fiesta Days Tennis Tournament Early Bird Registration Deadline

**June 29**  
Speedy Spaniard 10K and Mile Run Early Bird Registration Ends

Register now for Youth Fall Sports @ reconline.spanishfork.org

---

**Champions Challenge Rodeo**

Ever wondered what it would be like to see the All Stars of the PRCA rodeo in person? For ONE night only the top cowboys and cowgirls will be competing at the Spanish Fork City Fairgrounds on June 3rd @ 8:00pm. This is not an event you want to miss! Visit sfcitytix.com to get your seats today.

**Free Health & Wellness Fair (with Ty Detmer & Reno Mahe)**

The public is invited to join us at a FREE Health and Wellness Fair on Saturday June 17 from 9:00am-Noon at the Spanish Fork Sports Park. Come listen to special guest speakers Ty Detmer and Reno Mahe and meet professional bullfighter Joe Butler. Visit the vendor booths to learn more about: fitness, nutrition, mental health, social health, etc. The Recreation Department will have activities like steal the flag, kickball, dodge ball, and FREE hot dogs! We are also excited to announce a ribbon cutting for the brand new outdoor fitness equipment that will be installed at the Sports Park!
Water Conservation Tips

Conserve water this summer by following these 5 easy tips:

1. Water at night or at times when it is not windy
2. Aerate your lawn in the spring or the fall
3. Control Weeds. Weeds tend to use a lot of water
4. Check for leaks (inside and outside)
5. Use a broom to clean driveways, decks, or patios

Learn more @ https://conservewater.utah.gov/ or http://www.slowtheflow.org/

Weekly Events

Summer Story Times & Activities begin June 5

- Community Kindness Kick-off Every Monday @ 1pm
- Genre Challenge (Ages 13-18) Every Monday @ 3pm

Essential Oils Class Every Tuesday @ 7pm
Yoga Class Every Tuesday @ 7:30pm

Women’s Wellness Health Series Every Wednesday @ 6:30pm

Coding Club (Ages 8-18) Every Thursday @ 5pm
Dungeons & Dragons Club (Ages 13-18) Every other Friday @ 3pm
Anime/Manga Club (Ages 13-18) Every other Friday @ 4:00pm

Special Events

- Teen Advisory Board (Ages 13-18) June 8 @ 7pm
- Building Fantastical Worlds June 10 @ 1pm

2017 Candidate Filing Period

There will be a municipal election this year for one mayor and two city council positions (four-year terms, January 2018 to January 2021). The candidate filing period is June 1 to June 7, 2017. Interested parties may file for office in person with the city recorder Monday-Friday between the hours of 8am and 5pm at 40 South Main Street, Spanish Fork, UT.

Contact Us

Send Questions or Comments for the Mayor & City Council to:
Spanish Fork City Attn: Dear Mayor
40 South Main, Spanish Fork, UT 84660
We're pleased to present to you this year's Annual Drinking Water Quality Report. This report is designed to inform you about the quality of the water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water sources have been determined to be from ground water.

The Drinking Water Source Protection Plan for Spanish Fork City is available for your review. It contains information about source protection zones, potential contamination sources and management strategies to protect our drinking water. Our sources have been determined to have a low level of susceptibility from potential contamination sources. We have also developed management strategies to further protect our sources from contamination. Please contact us if you have questions or concerns about our source protection plan.

There are many connections to our water distribution system. When connections are properly installed and maintained, the concerns are very minimal. However, unapproved and improper piping changes or connections can adversely affect not only the availability, but also the quality of the water. A cross connection may let polluted water or even chemicals mingle into the water supply system when not properly protected. This not only compromises the water quality but can also affect your health. So, what can you do? Do not make or allow improper connections at your homes. Even that unprotected garden hose lying in the puddle next to the driveway is a cross connection. The unprotected lawn sprinkler system after you have fertilized or sprayed is also a cross connection. When the cross connection is allowed to exist at your home, it will affect you and your family first. If you'd like to learn more about helping to protect the quality of our water, call us for further information about ways you can help.

I’m pleased to report that our drinking water meets federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact 801-804-4500. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the third Tuesday of each month at 6:00 pm at the City Office Building, 40 South Main Street, Spanish Fork, Utah.

Spanish Fork routinely monitors for constituents in our drinking water in accordance with the Federal and Utah State laws. The following table shows the results of our monitoring for the period of January 1st to December 31st, 2016. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It’s important to remember that the presence of these constituents does not necessarily pose a health risk.

In the following table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:
**ND/Low - High** - For water systems that have multiple sources of water, the Utah Division of Drinking Water has given water systems the option of listing the test results of the constituents in one table, instead of multiple tables. To accomplish this, the lowest and highest values detected in the multiple sources are recorded in the same space in the report table.

**Parts per million (ppm) or Milligrams per liter (mg/l)** - one part per million corresponds to one minute in two years or a single penny in $10,000.

**Parts per billion (ppb) or Micrograms per liter (ug/l)** - one part per billion corresponds to one minute in 2,000 years, or a single penny in $10,000,000.

**Parts per trillion (ppt) or Nanograms per liter (nanograms/l)** - one part per trillion corresponds to one minute in 2,000,000 years, or a single penny in $10,000,000,000.

**Picocuries per liter (pCi/L)** - a measure of the radioactivity in water.

**Nephelometric Turbidity Unit (NTU)** - a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

**Action Level (AL)** - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

**Maximum Contaminant Level (MCL)** – The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

**Maximum Contaminant Level Goal (MCLG)** - The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

**Maximum Residual Disinfectant Level (MRDL)** - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

**Maximum Residual Disinfectant Level Goal (MRDLG)** - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

**Date** - Because of required sampling time frames i.e. yearly, 3 years, 4 years and 6 years, sampling dates may seem outdated.

</table>
If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Spanish Fork City is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the safe Drinking Water Hotline or at [http://www.epa.gov/safewater/lead](http://www.epa.gov/safewater/lead).

All sources of drinking water are subject to potential contamination by constituents that are naturally occurring or man made. Those constituents can be microbes, organic or inorganic chemicals, or radioactive materials. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency’s Safe Drinking Water Hotline at 1-800-426-4791.

MCLs are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice from their health care providers about drinking water. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

We at Spanish Fork City work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children’s future.
