

SPANISH FORK

PRIDE & PROGRESS

Spanish Fork, UT | 40 South Main Street | (801) 804-4500

JUNE 2018

COMMUNITY CALENDAR

June 4 & 5 Recycle pick up

June 5 City Council meeting at 6:00 p.m. Broadcast live on Spanish Fork 17 and YouTube

June 6 Planning Commission meeting at 6:00 p.m.

June 16 Health Fair at Spanish Fork Sports Park from 10:00 a.m. to 1:00 p.m.

June 18 & 19 Recycle pick up

June 19 City Council meeting at 6:00 p.m. Broadcast live on Spanish Fork 17 and YouTube

RECREATION CALENDAR

June 1 Summer swim team registration ends

June 5 Sports Fitness Camp Session II Registration ends (ages 6-12)

June 9 40th Annual Huck Finn Day at 9:00 a.m. at Canyon View Park

June 28 Fiesta Days Tennis Tournament early registration ends

June 29 Speedy Spaniard 10K and Mile Run early registration ends

Register for youth sports at reconline.spanishfork.org

FREE HEALTH & WELLNESS FAIR

You are invited to join us at the FREE Health and Wellness Fair on Saturday June 16th at the Spanish Fork Sports Park. We will kick off the morning with a 1.5 mile FAMILY FUN-WALK & RUN at 9:00am for all ages, strollers welcome, no registration required.

The Fair will be from 10:00am - 1:00pm where you can visit vendor booths to learn more about fitness, nutrition, mental health, social health, etc. The Parks and Recreation Department will have activities for kids, prizes, and FREE hot dogs!

#SF ACTIVE AND HEALTHY

Health Fair

Saturday June 16, 2018

10am - 1pm

Spanish Fork Sports Park
295 West Volunteer Drive

RIVER BOTTOMS PROJECT

Over the past few months, Logan Simpson, on behalf of Spanish Fork City, has been collecting public input about the vision for the River Bottoms. To review the summary documents, visit www.spanishfork.org/riverbottoms. Additional opportunities for public input will begin in June. Thank you to everyone that has participated in the visioning process!

spanishfork.org

2018 JUNIOR GOLF LESSONS

The Oaks at Spanish Fork is accepting registrations for its Junior Golf Camps. Sessions are \$50.00 and include: 2 days of golf swing fundamentals, 1 day of putting/chipping fundamentals, and 1 free 9-hole round of golf certificate. Classes are for ages 5-9 and ages 10-15.

First Session: June 4-6
Second Session: June 18-20
Third Session: July 16-18

For more information and registration visit www.theoaksatsf.com/lessons/junior_golf_camp.php or call (801) 804-4653

FOOD TRUCKS ON MAIN

Friday night dinner is made easy with Spanish Fork City's Food Trucks on Main. Each Friday a variety of food trucks will be parked along the north side of the Spanish Fork Library. Stop by and enjoy a bite to eat from 5:00 p.m. to 9:00 p.m.

HOW TO DRIVE IN A ROUNDABOUT

Roundabouts are a great way move traffic through an intersection faster. As roundabouts are becoming more and more common in our city, we wanted to take a moment to explain the best way to drive in a roundabout.

1. Slow down as you approach the roundabout
2. Choose your lane and signal
3. Yield to cars already in the roundabout
4. Enter the roundabout when the path is clear
5. Stay in your lane as you travel around the roundabout
6. Signal and exit the roundabout

We hope these steps are clear and helpful. Drive safe!

LIBRARIES ROCK!

Don't forget to Rock'n Roll down to the library this summer! We have lots of reading programs for everyone in the family! Check with us for all the rock'n details!

Women's Wellness Series Wednesday, June 6, 2018 at 6:00 p.m. Join us for a free four-session course taught by certified health educator, Mandi Peck, to learn about how to reduce stress, find gratitude daily, and love your body.

Women's Wellness Series Wednesday, June 13, 2018 at 6:00 p.m.

Q & A About Disney Internships Saturday, June 16, 2018 at 1:00 p.m. Are you interested in interning at "the happiest place on earth?" Join Blythe Stovall, former cast member at Disney World, to get all of your questions answered. (For ages 18 and up)

Women's Wellness Series Wednesday, June 20, 2018 at 6:00 p.m.

Women's Wellness Series Wednesday, June 27, 2018 at 6:00 p.m.

JUNIOR GOLF ASSOCIATION

The Oaks Junior Golf Association provides a competitive, fun, and affordable experience for youth to learn the rules of golf, play tournament golf, and be with their peers.

\$30 Membership includes:

- Youth On the Course Membership (Discounted golf rates at Utah County courses)
- A Spanish Oaks Junior Association T-shirt
- Rules and Etiquette Seminar (Mandatory for new members)
- If a player already has Youth On the Course then the membership fee is only \$20,
- The opportunity to play in tournaments at the Oaks. Each tournament cost \$15 per player.

For more information and registration visit www.theoaksatsf.com/associations/junior_association/index.php

Annual Drinking Water Quality Report - 2017

Spanish Fork City Water Department

We're pleased to present to you this year's Annual Drinking Water Quality Report. This report is designed to inform you about the quality of the water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water sources have been determined to be from ground water.

The Drinking Water Source Protection Plan for Spanish Fork City is available for your review. It contains information about source protection zones, potential contamination sources and management strategies to protect our drinking water. Our sources have been determined to have a low level of susceptibility from potential contamination sources. We have also developed management strategies to further protect our sources from contamination. Please contact us if you have questions or concerns about our source protection plan.

There are many connections to our water distribution system. When connections are properly installed and maintained, the concerns are very minimal. However, unapproved and improper piping changes or connections can adversely affect not only the availability, but also the quality of the water. A cross connection may let polluted water or even chemicals mingle into the water supply system when not properly protected. This not only compromises the water quality but can also affect your health. So, what can you do? Do not make or allow improper connections at your homes. Even that unprotected garden hose lying in the puddle next to the driveway is a cross connection. The unprotected lawn sprinkler system after you have fertilized or sprayed is also a cross connection. When the cross connection is allowed to exist at your home, it will affect you and your family first. If you'd like to learn more about helping to protect the quality of our water, call us for further information.

We're pleased to report that our drinking water meets federal and state requirements.

If you have any questions about this report or concerning your water utility, please contact **801-804-4500**. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the third Tuesday of each month at 6:00 pm at the City Office Building, 40 South Main Street, Spanish Fork, Utah.

Spanish Fork routinely monitors for constituents in our drinking water in accordance with the Federal and Utah State laws. The following table shows the results of our monitoring for the period of January 1st to December 31st, 2017.

All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily pose a health risk.

In the following table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

ND/Low - High - For water systems that have multiple sources of water, the Utah Division of Drinking Water has given water systems the option of listing the test results of the constituents in one table, instead of multiple tables. To accomplish this, the lowest and highest values detected in the multiple sources are recorded in the same space in the report table.

Parts per million (ppm) or Milligrams per liter (mg/l) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter (ug/l) - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

Parts per trillion (ppt) or Nanograms per liter (nanograms/l) - one part per trillion corresponds to one minute in 2,000,000 years, or a single penny in \$10,000,000,000.

Picocuries per liter (pCi/L) - picocuries per liter is a measure of the radioactivity in water.

Nephelometric Turbidity Unit (NTU) - nephelometric turbidity unit is a measure of the clarity of water. Turbidity in excess of 5 NTU is just noticeable to the average person.

Action Level (AL) - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Date - Because of required sampling time frames i.e. yearly, 3 years, 4 years and 6 years, sampling dates may seem outdated.

TEST RESULTS

Contaminant	Violation Y/N	Level Detected ND/Low-High	Unit Measurement	MCLG	MCL	Date Sampled	Likely Source of Contamination
Microbiological Contaminants							
Total Coliform Bacteria	N	ND	N/A	0	Presence of coliform bacteria in 5% of monthly samples	2017	Naturally present in the environment
Fecal coliform and <i>E coli</i>	N	ND	N/A	0	If a routine sample and repeat sample are total coliform positive, and one is also fecal coliform or <i>E coli</i> positive	2017	Human and animal fecal waste
Turbidity for ground water	N	0-2	NTU	N/A	5	2016	Soil runoff
Inorganic Contaminants							
Barium	N	53-106	ppb	2000	2000	2016	Discharge of drilling wastes discharge from metal refineries, erosion of natural deposits
Arsenic	N	ND-1	ppb	0	10	2016	Erosion of natural deposits, runoff from orchards, runoff from glass and electronics productions wastes
Copper A. 90% results B. # of sites that exceed the AL	N	A. 139 B. 0	ppb	1300	AL=1300	2016	Corrosion of household plumbing systems, erosion of natural deposits
Lead A. 90% results B. # of sites that exceed the AL	N	A. ND-5 B. 1	ppb	15	AL=15	2016	Corrosion of household plumbing systems, erosion of natural deposits
Nitrate (as Nitrogen)	N	ND-1	Ppm	10	10	2017	Runoff from fertilizer use, leaching from septic tanks, sewage, erosion of natural deposits
Selenium	N	2-4	ppb	50	50	2016	Discharge from petroleum and metal refineries, erosion of natural deposits, discharge from mines
Sodium	N	4-43	ppm	500	None set by EPA	2016	Erosion of natural deposits, discharge from refineries and factories, runoff from landfills
Sulfate	N	22-96	ppm	1000	1000	2016	Erosion of natural deposits, discharge from refineries and factories, runoff from landfills, runoff from cropland
TDS (Total Dissolved Solids)	N	212-444	ppm	2000	2000	2016	Erosion of natural deposits
Disinfection By-products							
TTHM (Total Trihalomethanes)	N	ND-4	ppb	80	80	2017	By-product of drinking water disinfection
Chlorine	N	280	ppb	4000	4000	2015	Water additive used to control microbes
Radioactive Contaminants							
Alpha emitters	N	ND-4	pCi/1	0	15	2016	Erosion of natural deposits
Radium 228	N	ND-1	pCi/1	0	5	2016	Erosion of natural deposits

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Spanish Fork City is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the safe Drinking Water Hotline or at www.epa.gov/safewater/lead.

All sources of drinking water are subject to potential contamination by constituents that are naturally occurring or man made. Those constituents can be microbes, organic or inorganic chemicals, or radioactive materials. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

MCLs are set at very stringent levels. To understand the possible health effects described for many regulated constituents, a person would have to drink 2 liters of water every day at the MCL level for a lifetime to have a one-in-a-million chance of having the described health effect.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice from their health care providers about drinking water. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

We at Spanish Fork City work around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.
