Zone AO is the flood insurance risk zone that corresponds to the 0.2 percent-annual-chance floodplain. Areas of 0.2 percent-annual-chance floodplain that are determined in the FIS from the detailed hydraulic analyses are shown as outlined areas within the zone.

Whole-foot BFEs derived from the detailed hydraulic analyses are shown as outlined areas within the zone.

Zone AO1: 100-year floodplain where the average depth is less than 1 Foot.

Zone A: 100-year floodplain that is determined in the FIS and shows at selected intervals within this zone.

Whole-foot BFEs derived from the detailed hydraulic analyses are shown as outlined areas within the zone.

Zone A1: 100-year floodplain - Zone where channel cannot be modified.

Zone AE: 1 percent-annual-chance shallow flooding (usually sheet flow on sloping terrain) where average depths are between 1 and 3 feet. The 1 at the end of the AO designation identifies the area as Zone AO1.

Zone AH: 1 percent-annual-chance floodplains that are determined in the FIS.

Total flood depths are shown within this zone.
